INSTRUCTIONS

Most gynaecological scans & early pregnancy scans (less than 12wk) will be performed internally (transvaginal) which produces a better image and more information, therefore you will not require a full bladder. If this technique is not appropriate for you, please let our staff know that you will need an abdominal ultrasound and attend with a full bladder.

Mid (more than15wk) and late pregnancy scans require a comfortably full bladder: 2 glasses of water 1 hour prior to your appointment and hold on until you speak with our receptionist.

Full payment required on the day of your appointment. We accept CASH, CREDIT CARD & EFTPOS

The clinic welcomes all family members when an ultrasound is required. We believe that pregnancy is a family experience and all concerned are welcome.

3D/4D obstetric ultrasounds are performed routinely but image quality is dependent on baby position, views and maternal shape and size.

This referral can be used at any appropriate imaging provider after discussion with your doctor.
